November 13, 2019

The Honorable Brian Fitzpatrick
1722 Longworth HOB
Washington, DC 20515

Dear Congressman Brian Fitzpatrick:

We are writing on behalf of Main Street Americans who have become the target of the Health Insurance Tax (HIT) – a devastating tax imposed on health insurance premiums through the Affordable Care Act (ACA). The HIT would make health care less affordable for hardworking Americans most in need of relief. If no action is taken, the HIT will go back into effect on January 1, 2020. We urge you to take immediate action by delaying implementation of the HIT.

Estimates from actuarial consulting firm Oliver Wyman suggest that in 2020 alone, the HIT will cost Pennsylvanians $820 million in increased premiums and $16 billion nationwide. Over a decade, the tax is expected to cost families across the country $5,000 in higher premiums and could reduce the U.S. workforce by 152,000 to 286,000 private sector jobs.

If brought back, the HIT would have a particularly devasting impact on U.S. businesses and the economy. The HIT would impact 23 million Americans with employer-sponsored coverage and jeopardize the future of 1.7 million small businesses. More specifically, the HIT would increase premiums by up to $493 for Pennsylvania residents with employer-sponsored coverage and by $210 for consumers in the individual market.

The HIT targets Americans who can least afford it. More than half of the entire tax would be paid by those with incomes between $10,000 and $50,000. As a result, our state Medicaid program would face $197 million in higher costs, putting a significant strain on the state budget. The tax would also put
Medicare beneficiaries at risk, with higher premiums, increased cost-sharing and fewer supplemental benefits. As a result of the HIT, seniors and individuals with disabilities in Pennsylvania would see their premiums increase by an estimated $472 in 2020. With many of America’s seniors living on fixed incomes of less than $20,000 annually, beneficiaries simply cannot afford to pay more for the critical health care they need.

We represent broad interests but are united in our conviction that this tax greatly hinders access to health care and the ability to support and grow our country’s workforce. Congress has provided relief from the health insurance tax (HIT) twice before and should do so again to prevent its return in 2020. We ask that you include a delay of the HIT in any must-pass legislation this year.

Thank you for your support of hardworking Pennsylvanians who cannot afford the devastating costs associated with the HIT. We look forward to working with you to delay this tax as quickly as possible.

More specifically, the HIT would increase premiums by up to $493 for Pennsylvania residents with employer-sponsored coverage and by $210 for consumers in the individual market.

The HIT targets Americans who can least afford it. More than half of the entire tax would be paid by those with incomes between $10,000 and $50,000. As a result, our state Medicaid program would face $197 million in higher costs, putting a significant strain on the state budget. The tax would also put

...
Medicare beneficiaries at risk, with higher premiums, increased cost-sharing and fewer supplemental benefits. As a result of the HIT, seniors and individuals with disabilities in Pennsylvania would see their premiums increase by an estimated $472 in 2020. With many of America’s seniors living on fixed incomes of less than $20,000 annually, beneficiaries simply cannot afford to pay more for the critical health care they need.

We represent broad interests but are united in our conviction that this tax greatly hinders access to health care and the ability to support and grow our country’s workforce. Congress has provided relief from the health insurance tax (HIT) twice before and should do so again to prevent its return in 2020. We ask that you include a delay of the HIT in any must-pass legislation this year.

Thank you for your support of hardworking Pennsylvanians who cannot afford the devastating costs associated with the HIT. We look forward to working with you to delay this tax as quickly as possible.

The Honorable Fred Keller  
1717 Longworth HOB  
Washington, DC 20515

Dear Congressman Fred Keller:

We are writing on behalf of Main Street Americans who have become the target of the Health Insurance Tax (HIT) – a devastating tax imposed on health insurance premiums through the Affordable Care Act (ACA). The HIT would make health care less affordable for hardworking Americans most in need of relief. If no action is taken, the HIT will go back into effect on January 1, 2020. We urge you to take immediate action by delaying implementation of the HIT.

Estimates from actuarial consulting firm Oliver Wyman suggest that in 2020 alone, the HIT will cost Pennsylvanians $820 million in increased premiums and $16 billion nationwide. Over a decade, the tax is expected to cost families across the country $5,000 in higher premiums and could reduce the U.S. workforce by 152,000 to 286,000 private sector jobs.

If brought back, the HIT would have a particularly devastating impact on U.S. businesses and the economy. The HIT would impact 23 million Americans with employer-sponsored coverage and jeopardize the future of 1.7 million small businesses. More specifically, the HIT would increase premiums by up to $493 for Pennsylvania residents with employer-sponsored coverage and by $210 for consumers in the individual market.

The HIT targets Americans who can least afford it. More than half of the entire tax would be paid by those with incomes between $10,000 and $50,000. As a result, our state Medicaid program would face $197 million in higher costs, putting a significant strain on the state budget. The tax would also put...
Medicare beneficiaries at risk, with higher premiums, increased cost-sharing and fewer supplemental benefits. As a result of the HIT, seniors and individuals with disabilities in Pennsylvania would see their premiums increase by an estimated $472 in 2020. With many of America’s seniors living on fixed incomes of less than $20,000 annually, beneficiaries simply cannot afford to pay more for the critical health care they need.
