includes:
1. identifying the threats: the no-cost network assessment will scan your network to identify threats that could pose a risk to your current environment.
2. estimating your it risk exposure: we will determine what risks your company could be exposed to based on the threats that were identified during the scans.
3. recommendations to manage your risks: high-level recommendations will be provided that could help manage the risks to your organization, again based on the information gathered during the network assessment process.

sign up in the first quarter of 2019 to be eligible for this no-cost promotion.
