RE: Support Transparency and Reform to State Air Emissions Rules, HB 2075

On behalf of the PA Chamber of Business and Industry I urge you to support **HB 2075**, which provides greater clarity and certainty with respect to emissions standards for heavy trucking.

HB 2075 codifies DEP's recent announcement it was suspending enforcement of certain air quality emissions standards for heavy trucking, which are incorporated by reference from California. California's rules are subject to change without the input or consent of Pennsylvania's general public and private industry, and absent the change that would be legislated under HB 2075 the private sector, particularly businesses involved in the logistics and trucking sector at time when the supply chain is under duress, will be forced to expend significant resources to stay in compliance or purchase vehicles out-of-state.

We urge you to vote yes on this legislation, which passed the House with a strong, bipartisan vote this past December. For any questions or further discussion, please contact Kevin Sunday, Director of Government Affairs, at ksunday@pachamber.org or 717-645-2071.
