AI SUMMIT DEMOS

Healthcare Virtual Reality

(Healthcare)

This demo utilizes virtual reality and digital twins to create immersive experiences for medical professionals and patients. Attendees will explore how VR simulations enhance healthcare training, visualize complex procedures, and foster real-world understanding for scenarios like surgery and patient care.

Infrastructure Insights Pro

(Infrastructure and Transportation)

This demo leverages geospatial analytics and generative AI to deliver actionable insights for transportation and mobility. Attendees will discover how real-time data integration accelerates incident detection, streamlines event planning, and optimizes investments—ultimately advancing safer, more connected communities.

Grants AI

(All Industries)

This demo demonstrates how a conversational platform powered by Azure OpenAI simplifies the search and evaluation of funding opportunities. Attendees will see how intelligent filtering aligns options with user needs and eligibility, increasing efficiency and supporting smarter resource allocation.

PermitAI

(Energy, Climate and Sustainability)

This demo highlights how AI-driven analysis validates applications for compliance, accelerates approval routing, and delivers real-time feedback. Attendees will observe how these capabilities streamline project initiation and enhance regulatory transparency for agencies and applicants alike.

Google AI Suite

(All Industries)

This AI solution demonstrates how integrated, user-friendly tools can accelerate project delivery and enhance insights. From swiftly generating custom learning podcasts with NotebookLM to leveraging Gemini-powered digital assistants, Google's demo reveals the real-world impact these innovations can deliver for stakeholders.

BenefitGuide AI Agentic Assistant

(Human Services)

This demo demonstrates how agentic AI assists users with eligibility verification, enrollment processes, and ongoing updates. Attendees will experience automated, conversational support available anytime—whether by chat, phone, or SMS.

TrueServe

(All Industries)

This demo highlights how pre-built accelerators enable customer self-service, channel orchestration, and guided agent flows. Attendees will see modern engagement features like conversational AI, agent assist, interaction summarization, customer insights, and performance analytics across every touchpoint.

Financial Transformation AI Suite

(Finance)

This suite of AI solutions empowers finance teams by automating narrative generation for financial data, delivering strategic insights and visualizations in SAP environments, identifying risk assessment themes, and supporting compliance with federal accounting standards.

AWS AI Suite

(All Industries)

This suite of AI solutions showcases how Amazon Quick Suite's unified AI agents drive faster research, actionable insights, and seamless automation, while Intelligent Document Processing leverages AI to efficiently extract and summarize data from unstructured documents—boosting decision-making, compliance, and overall business productivity.
